Support

Scope 1 • 2 reduction solutions

We offer a wide variety of plans including electricity, gas, renewable energy, energy saving solutions, air conditioning systems, and carbon credits.

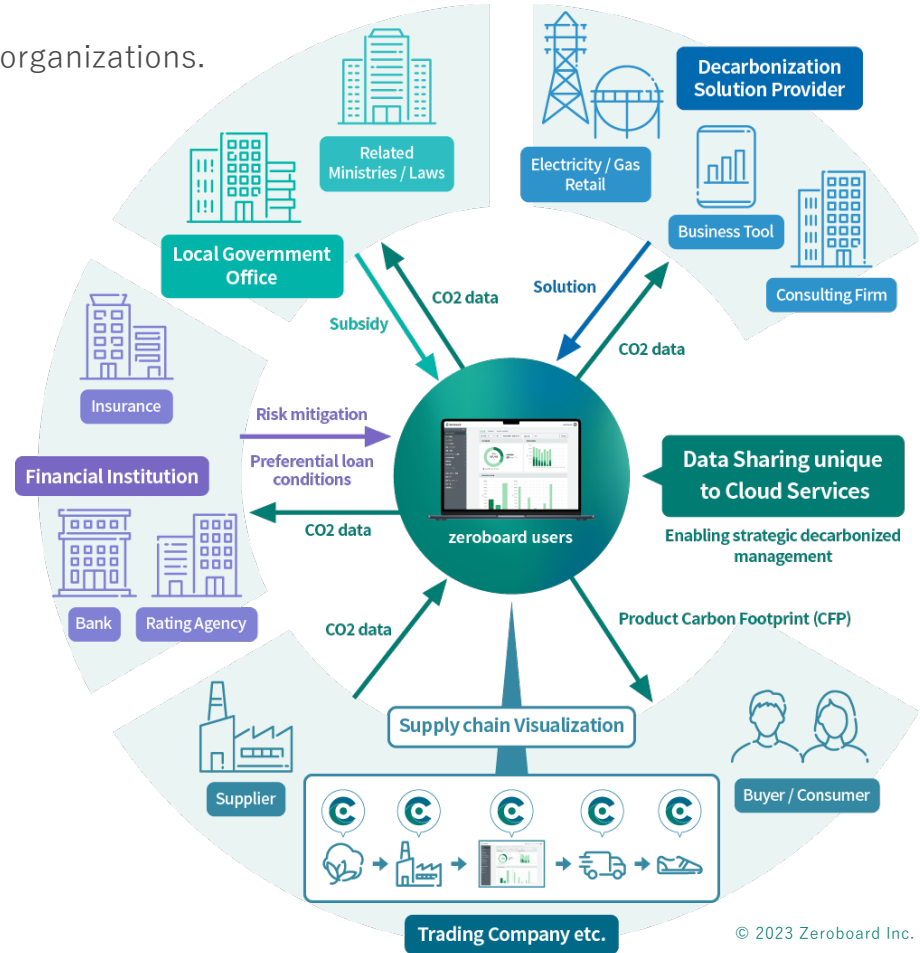

Scope 3 reduction solutions

We offer plans to reduce emissions in production and delivery processes, including procurement of environmentally friendly materials, service development & evaluation, and transportation electrification support.

Financial support

Emissions accounting and reduction efforts to support financing through Sustainably Linked Loans and to support the development and execution of ESG ratings and sustainability-related strategies.

| Our Message

TOWARDS DECARBONIZATION

Decarbonization cannot be achieved by one company and we “Zeroboard” believe that **ecosystem together with partners** using Zeroboard enables it.

CO-CREATION

In Thailand, we are **looking for partners** to build an ecosystem together.

MAXIMIZING BUSINESS OPPOTUNITIES

Increase the corporate value of Thai companies and attract investment through decarbonization initiatives.

ZeroBoard

Thank you
